“

Families are in risk of losing their income source, and the kids are suffering from threats of losing their parents.

Would you be their companion, to offer power and hope to the families with cancer patients?”

”

Mr. Lai had his drug bills all over the table. Having been subsidized to pay off the treatment, he recovered from cancer and gave back to the Fund to help other people suffered from cancer.

A Fund Revived a Cancer Patient's Life

As a healthy, cigarette and alcohol-free 62-year-old man, Mr. Lai was diagnosed with terminal lung cancer three years ago. "It shook my mind! The first thing that came into my mind was, if I really die this way, who is going to take care of my 90-year-old mom..."

Thinking that his mother would be left alone, Mr. Lai was determined to fight back. The doctor advised Mr. Lai that chemotherapy could help reverse the condition. However, chemotherapy drug costs \$4,000 per injection, and 17 to 18 injections were required for each treatment course. As a taxi driver, he had no way to afford such huge medical expenses as he would have no income at all if he did not work.

Fortunately, upon referral from medical social worker, Mr. Lai successfully applied for "YOT Chong Sok Un Medical Fund (cancer aid)", and over \$70,000 of funding was granted for his treatment. After more than one year of treatment, his medical condition was stabilized in a desirable way.

"I could never imagine that, the fund that I once donated money to would save my life when I felt the most desperate ever. Therefore, I recently donated \$1,500 of my saving to the Fund. I hope there would be more people in the society donating, and bringing hopes to other helpless cancer patients' life!"
